PREGNANCY POLICY

PREGNANT AGED 18+

We recommend that pregnant people do not take part in Air Space (since it is a robust trampoline activity and there are therefore associated risks). However, ultimately the choice is yours. We are not medical experts and therefore suggest that you seek advice from your doctor before taking your decision.

If, despite our recommendation, you decide to proceed, please sign below that you have read and understood the following statement:

“I have made Air Space aware that I am pregnant and as a result Air Space have strongly advised me not to take part in the trampoline activities. However I have decided to take part in the full knowledge that this will incur risks to me and my unborn child”.

Signed: ................................................................. Date: .................................................................

PREGNANT UNDER 18s

In law, under 18 year olds are classified as minors and so are unable to consent to the increased risks to their unborn child. For this reason we do not permit any pregnant person under the age of 18 to undertake the activity.

To be kept on site and a note added to the customer records on the Xtranet.
